<http://oikos-international.org/copenhagen/projects/oikos-academy/oikos-academy-2014-signup/#content>

### **Diplomas**

You will receive a signed diploma if you have attended 4 out of 6 lectures. We will have a registration desk in front of every lecture. Make sure you register at the desk to receive a diploma!

We send out Diplomas to all participants that registered for 4 lectures after the spring Academy 2014 closes.

## Lectures

Two introductory lectures from Dansk Industri and UNEP, will give an overview and guide to the topic. Afterwards, three organizations will present specific projects around the resources Wind, Waste and Water.

**18<sup>th</sup> February**      Climate Change effects on Business, Resources & future leaders

*Karin Klitgaard - Head of Environmental Policy*

Karin will introduce to the overall topic from a top-down perspective, starting at UN-level. She will present cases from DI members, related to Wind, Waste & Water, and how greentech influences the competitiveness of the Danish Industry. She will conclude by outlining skills demanded from future leaders, where sustainability becomes more and more relevant.

**4<sup>th</sup> March**      Business opportunities for mitigation action in developing countries

*Karen Holm Olsen - Senior Researcher UNEP Risø Centre*

Karen will give an overview on how climate change affects business in the developing world, and what opportunities it opens for business. She will then touch upon Greenhouse Gas (GHG) emission reductions & challenges in the developing world. More specifically, she will explain the status of a global market mechanism for GHG trading.

United Nations  
Environment Program

**18<sup>th</sup> March**      Wind for Prosperity

*Anders Riis - Marketing, Communication & Corporate Relations*

Anders will introduce you to the Vestas Wind for Prosperity project, an innovative business model to bring affordable electricity to energy-poor, wind- rich rural communities.

**1<sup>st</sup> April**      Climate Change, Waste & EU municipal initiatives

*Almut Reichel, Project Manager Sustainable Consumption, Production & Waste*

Almut will give an overview on the effects of waste on climate change, EU waste policy and key concepts and targets. She will then introduce you to key trends in waste generation & management on a municipal level.

**15<sup>th</sup> April**      Water
